

Certification of Solar Energy or Energy Storage Projects Qualifying under §58.1-3660

Certified pollution control equipment and facilities are declared to be a separate class of property and shall be exempt from state and local taxation. Such property shall include solar energy equipment, facilities, or devices, and energy storage systems capable of absorbing energy, storing it for a period of time, and redelivering that energy. **All equipment must be owned or operated by a business.** Virginia Energy shall determine whether such facilities, devices or systems qualify for certification under [Code of Virginia § 58.1-3660](#) based on the information provided on this application and attested to before a notary. Please submit this completed application electronically to ken.jurman@energy.virginia.gov.

Project Name (if applicable):

Project Location:

If no physical address, use
Lat/Long **AND** include the
county & town it is in.

Project Owner or Developer:

Contact:

Email:

Phone:

Business Address:

City:

State:

Zip:

Date on which an initial interconnection request* form was filed with an electric utility or a regional transmission organization:

***Please include a copy of the interconnection request or agreement with this application.**

This application is for what type of project?

Solar Energy

Stand-alone Energy Storage

Solar Energy Plus Storage

Please list the name, address and FEIN of all contractors purchasing tax exempt parts and supplies for this project below. All contractors and subcontractors purchasing tax exempt materials must request their own form ST-11a by submitting a copy of this application, once approved by Virginia Energy, to the Virginia Department of Taxation:

Please provide a description of the project. Please include the system capacity (AC) and the approximate number and type of major system components (panels, inverters, transformers, etc.) Please include the makes and models if possible.

By signing below in the presence of a Notary Public the applicant certifies that all information is truthful and correct and that the equipment, facilities, or devices for which certification as pollution control equipment is requested complies with all statutory requirements. Virginia Energy reserves the right to physically inspect any and all solar energy and energy storage equipment, facilities, or devices.
